Global systemically important banks indicators

The Basel Committee on Banking Supervision (Basel Committee) has established a number of indicators that help determine whether a bank can be classified as a Global Systemically Important Bank, or G-SIB. Banks that meet the criteria are subject to additional supervisory requirements aimed at mitigating systemic risk in the financial system. ING reports these indicators every year to the Basel Committee (through DNB). We are also required to publish the main indicators on our external website. These are published in the Investor Relations section.

The table below displays the 14 size indicators for ING Groep N.V. as at 31 December 2024. These size indicators are unaudited and based on the definitions included in the instructions of the Basel Committee.
