- NIM has increased from 132 bps in 2012 to 148 bps in 1H14, supported by re-pricing and lower funding costs
- Funding costs are decreasing as a result of lower clients savings rates and lower coupon rates on new issued debt
- ING further reduced the client savings rates in 3Q14 in Germany, Netherlands, Belgium and Spain
- Re-pricing, asset growth and lower funding costs will support the NIM, offsetting pressure from the low interest rate environment
