Global systemically important banks indicators

The Basel Committee on Banking Supervision (Basel Committee) has established a number of indicators that help determine whether a bank can be classified as a Global Systemically Important Bank, or G-SIB. Banks that meet the criteria are subject to additional supervisory requirements aimed at mitigating systemic risk in the financial system.

The guidance for the 12 indicators the Basel Committee uses to classify a bank as systemically important was updated in December 2015.

The table below displays the 12 size indicators for ING Groep N.V. as at 31 December 2016. These size indicators are unaudited and based on management's current views and assumptions of the assessment methodology and instructions of governments and/or regulatory authorities for the data collection exercise. Furthermore, these size indicators are subject to amendment due to changes in management's views as well as changes in laws, regulations, policies and guidance of governments and/or regulatory authorities with respect to a.o. the assumptions and methodologies used.
