thinkforward

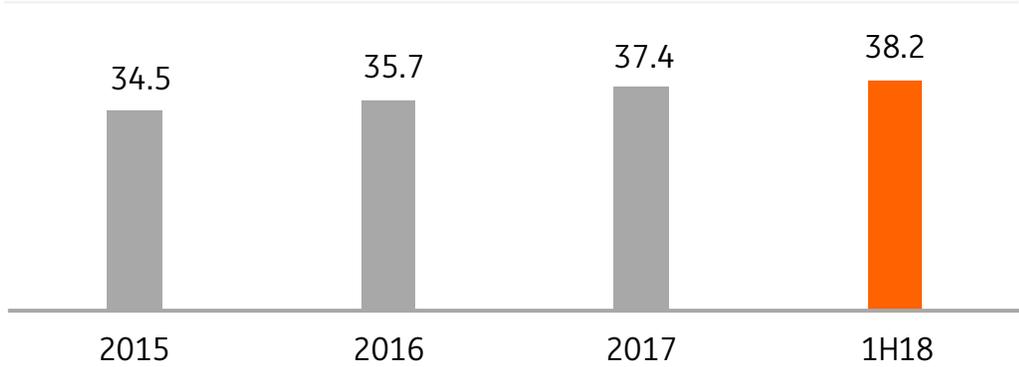

# Key points

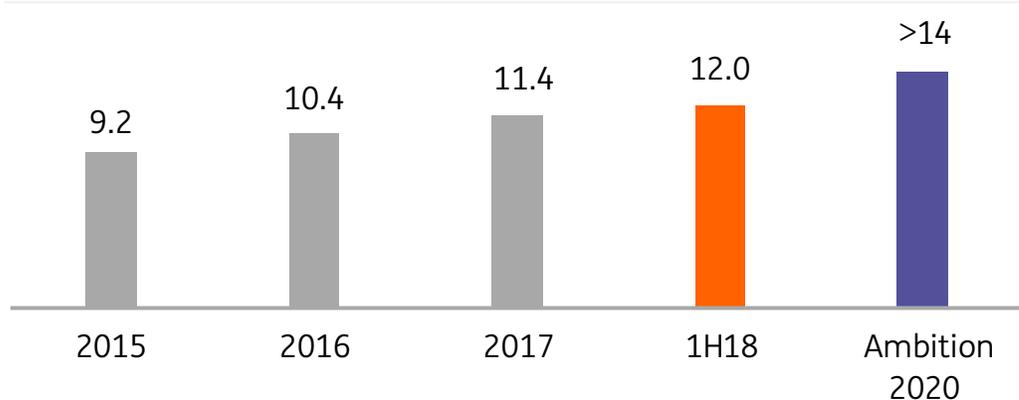

- ING posted 2Q18 net profit of €1,429 mln, up 4.2% on 2Q17
- Result reflects well-diversified and disciplined loan growth at stable margins, strong fee income, and low risk costs
- Primary customers increased by 400,000 in 2Q18 to 12.0 mln, total retail customers reached 38.2 mln
- Important transformation milestones achieved including migration of Record Bank customers to ING in Belgium
- Group-wide cost control remains key focus as digital investment spend remain elevated
- On a four-quarter rolling average basis, ING Group's underlying return on equity was 10.4%
- Fully loaded CET1 ratio at 14.1% due to impact from continued profitable loan growth and a macro-prudential add-on in Belgium
- ING will pay an interim cash dividend of €0.24 per share over the first six months of 2018

# Think Forward strategy delivers on commercial growth

ING currently serves > 38 mln retail customers\* (in mln)

Targeting > 14 mln primary customers\* by 2020 (in mln)

## Core lending

1H18 net growth

€ +26.5 bln

## Customer deposits

1H18 net growth

€ +8.2 bln

## Net Promoter Scores (NPS)

As per 2Q18

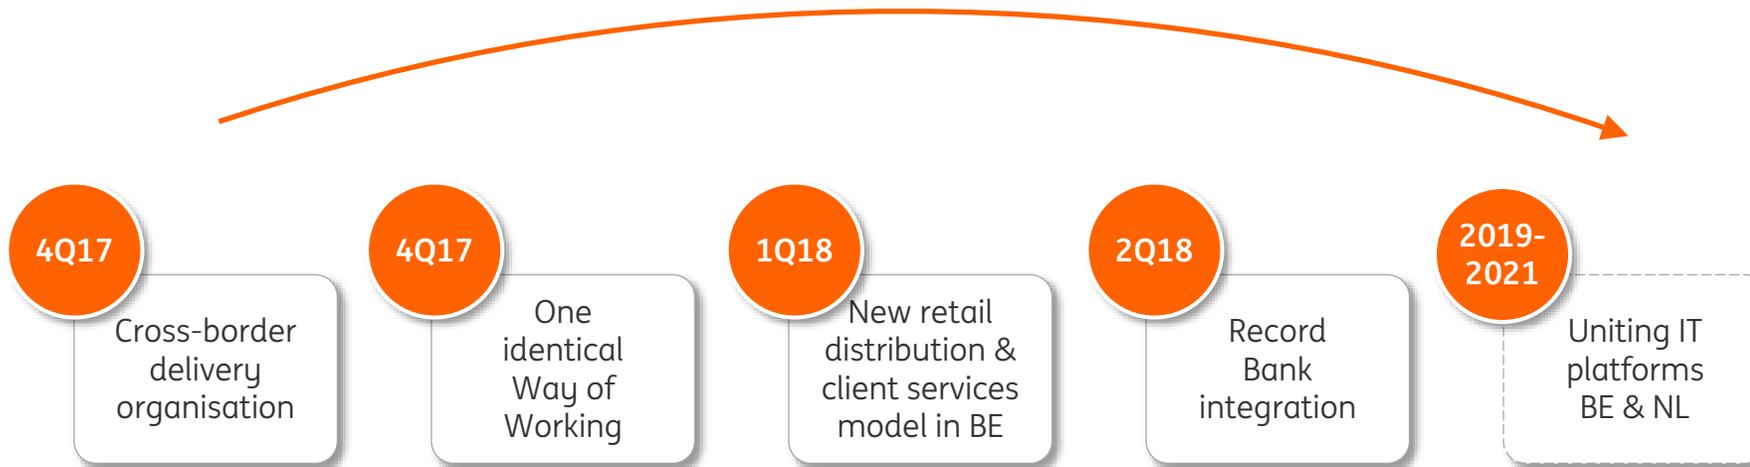

#1 in 6 out of 13 retail countries

\* In 2Q18, the Netherlands refined its measurement of customers to align with uniform definitions across ING's countries. Customer numbers were restated as of 2016. In addition, the merger of Record Bank into ING in Belgium was completed in 2Q18; customer numbers were consolidated accordingly as from 2Q18, resulting in an 80k increase in primary customers.

# Orange Bridge: multiple transformation milestones reached

Preparing for an integrated banking platform in Belgium and the Netherlands

- Investments and use of external staff still at elevated level in the first half of 2018
- ING in Belgium and Record Bank have now joined forces: almost 600,000 Record Bank customers were successfully migrated to ING and introduced to the clear & easy ING customer experience
- Priorities going forward are to rationalise our product assortment and to unite the IT platforms of Belgium and the Netherlands

# Becoming the go-to platform for all financial needs

## Building insurance platform with AXA

- ING is **partnering with AXA** to create personalised, simple and modular insurance products and services for customers
- The **digital insurance platform** will offer property & casualty (P&C), health and protection insurance in **six of our Challenger markets** (Australia, Austria, France, Germany, Italy and Czech Republic), in a clear and easy way

## Yolt expands to France and Italy

- Yolt, our money management platform in the UK, is expanding **to France and Italy**
- This is part of our ambition to **build a pan-European money platform**
- The smart money app, which provides customers a one-stop overview of their accounts, has attracted **400,000 registered users in the UK** since its launch in June 2017

## New funding initiatives for SMEs

- We partnered **with Funding Options** in the Netherlands and invested in **FinCompare** in Germany – two independent digital platforms that offer SMEs a wide choice of financing options
- In Poland, we launched **Invoice Financing** for SMEs, a digital microfactoring solution that we developed in-house

# Playing a pivotal role in the energy transition

## Financing linked to company's own sustainable KPIs

- We help clients stay ahead by encouraging sustainable business practices and supporting sustainable transitions
- We continue to pioneer sustainability-linked financing. After introducing loans linked to a sustainability rating, we now developed loans linked to a company's own key performance indicators (KPIs) on sustainability. 2Q18 deal examples include:

€1 bln syndicated facility  
ING role: Sustainability coordinator

€550 mln green loan  
ING role: Joint bookrunner & joint coordinator

## Solutions to reduce carbon footprint of real estate

- In the Netherlands, we introduced the Energy Robot for real estate clients. It uses algorithms to compare data from smart energy meters to automatically identify where energy waste can be reduced
- First revolving credit facility (RCF) linked to the GRESB ESG\* sustainability rating for real estate:

€150 mln RCF  
ING role: Sustainability lender

## Application of new Green Loan Principles

- First financial institution to issue a loan under the Green Loan principles which were co-developed by ING:

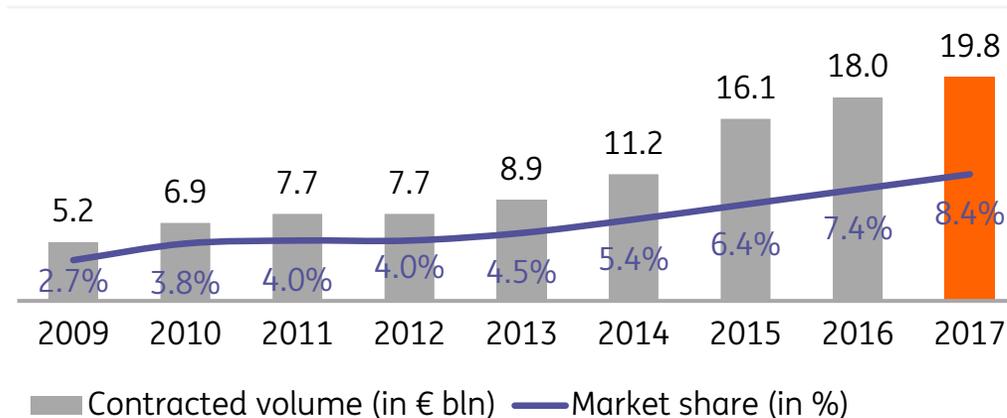

£500 mln green loan  
ING role: Green structuring advisor

\* GRESB is an ESG (Environmental, Social and Governance) rating for real estate

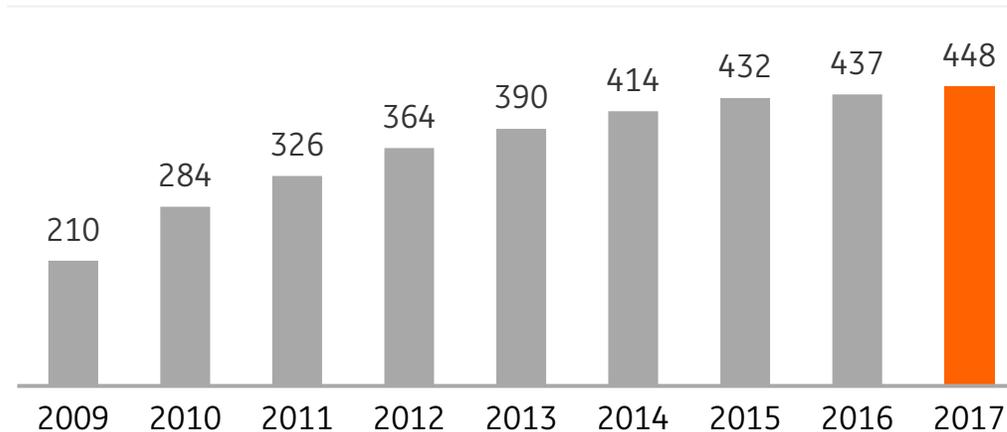

# Interhyp – one of Germany’s first fintechs – revolutionised the mortgage market and fits perfectly in ING’s platform strategy

- Operates a proprietary mortgage platform comparing and processing the offers of >400 lenders
- Independent personal advice to private customers through its >100 offices
- >95% commission income, no mortgages on Interhyp balance sheet, highly profitable with >30% EBT margin
- Full focus on best customer experience with Net Promoter Score of >80
- With a closed mortgage volume of >€125 bln since going live in 2000, Interhyp has deep market insights on the German mortgage/real estate market

# 2Q18 results

# Underlying pre-tax result up 1.5% year-on-year

Underlying pre-tax result (in € mln)

Underlying income (in € mln)

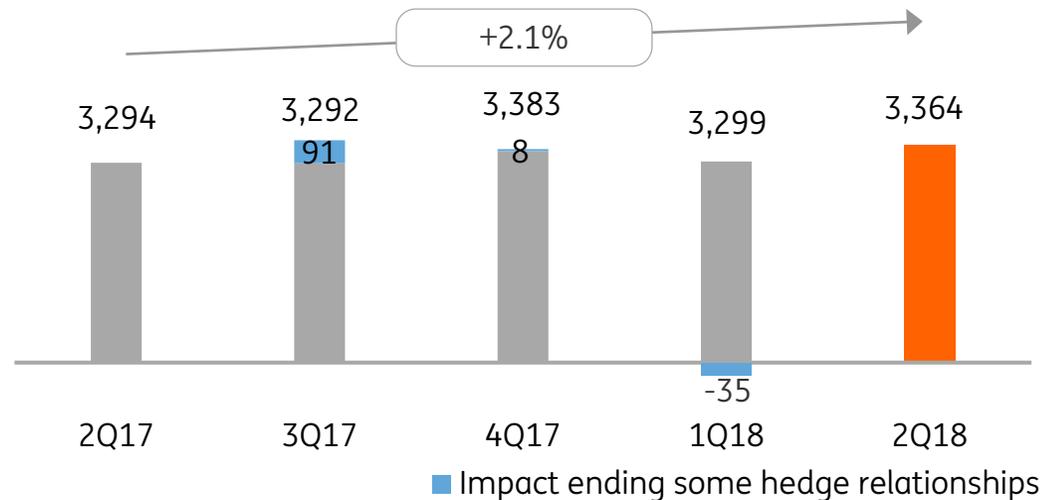

■ One-off gain

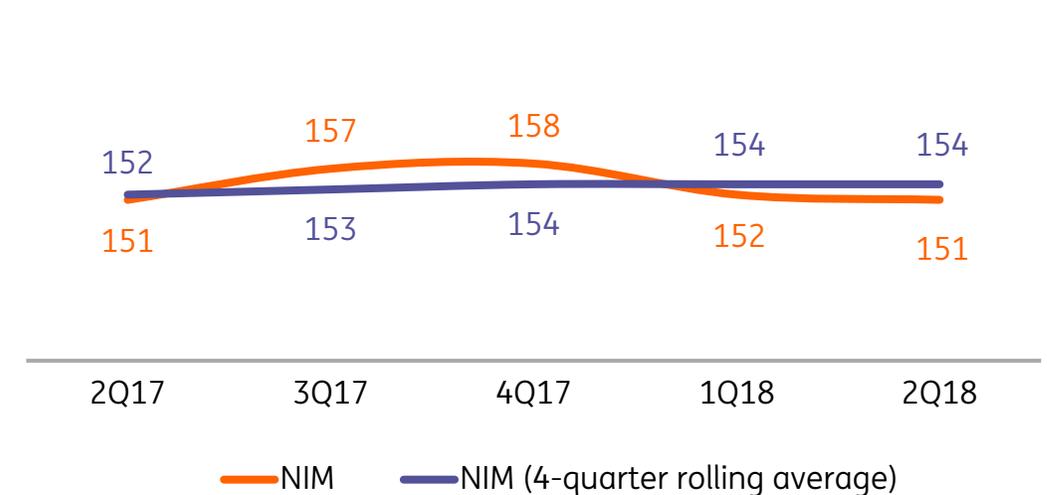

- Underlying result before tax of €2,022 mln was supported by continued loan growth and higher net fee and commission income, while risk costs remained low. On a four-quarter rolling average basis, the underlying ROE improved to 10.4% from 10.3% in 1Q18
- Underlying income was supported by higher income from continued business growth in Retail Challengers & Growth Markets and the Wholesale Banking lending activities, but declined slightly compared to the year-ago quarter
- This is largely explained by a €97 mln one-off gain on the sale of an equity stake in the real estate run-off portfolio in 2Q17, negative currency impacts and weak performance in Financial Markets in the current quarter

# Healthy net income progression supported by resilient NIM

Net interest income excl. Financial Markets (in € mln)

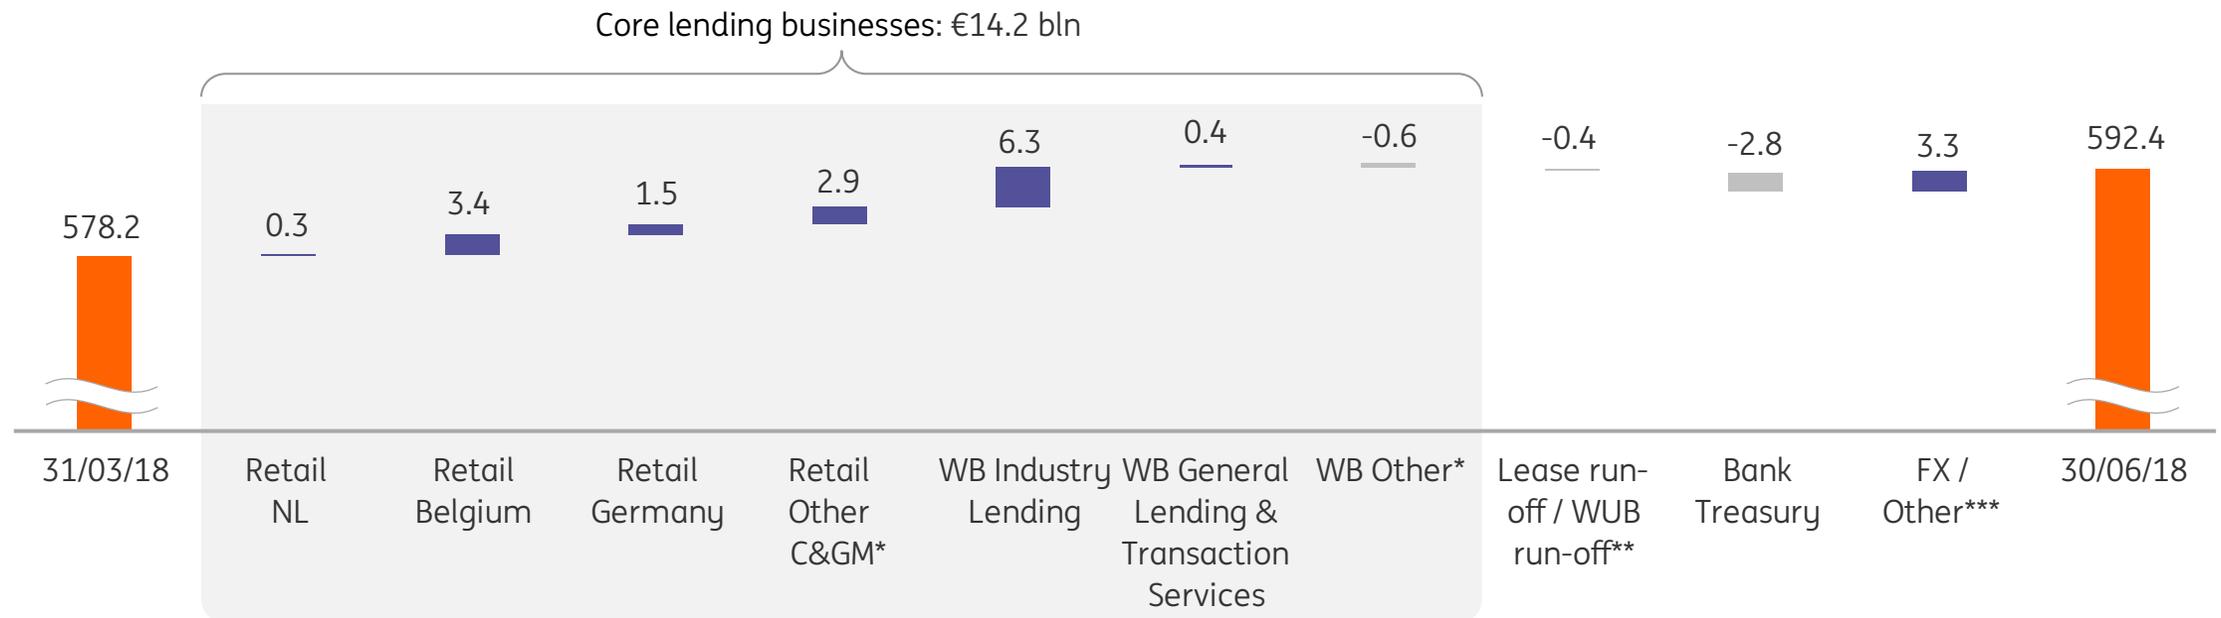

Net interest margin holds up well in the quarter (in bps)

- Net interest income excl. Financial Markets increased 2.1% versus 2Q17. The increase was mainly caused by a higher interest result in Retail Challengers & Growth Markets and Wholesale Banking
- Total NII on customer lending increased year-on-year due to the positive impact of loan volume growth at a higher overall margin, which was partly offset by a lower interest result on customer deposits (mostly as a result of lower reinvestment yields)
- The 2Q18 NIM was 151 bps, which is one basis point down on the previous quarter, due to lower interest results in Financial Markets, Bank Treasury and Corporate Line

# Core lending growth in Retail Banking and Industry Lending

## Customer lending ING Group 2Q18 (in € bln)

- Our core lending franchises grew by €14.2 bln in 2Q18, with growth again well diversified and at good returns:
  - Retail Banking increased by €8.1 bln with growth being recorded in all geographies (incl. Retail Netherlands)
  - Wholesale Banking increased by €6.1 bln, predominantly in various Industry Lending sectors

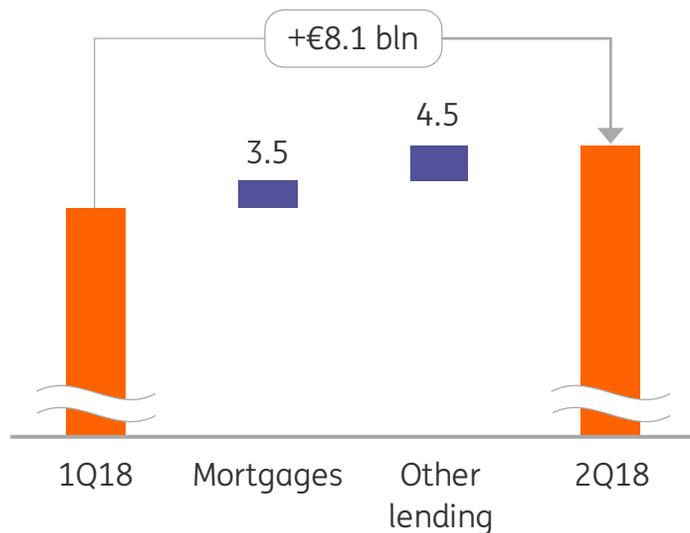

\* C&GM is Challengers & Growth Markets; WB Other includes Financial Markets

\*\* Lease run-off was €-0.1 bln, WUB run-off was €-0.3 bln

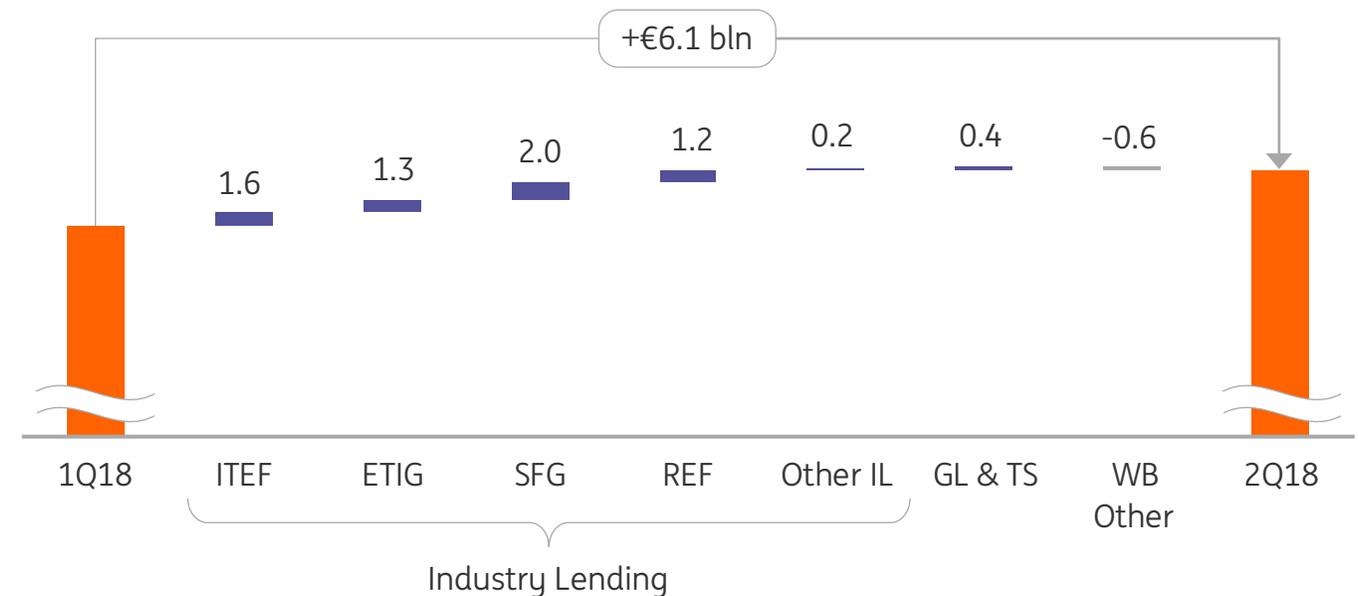

\*\*\* FX impact was €3.1 bln and Other €0.2 bln

# Detailed split of net core lending growth

Retail Banking core loan growth split by product (in € bln)

Wholesale Banking\* core loan growth split by product (in € bln)

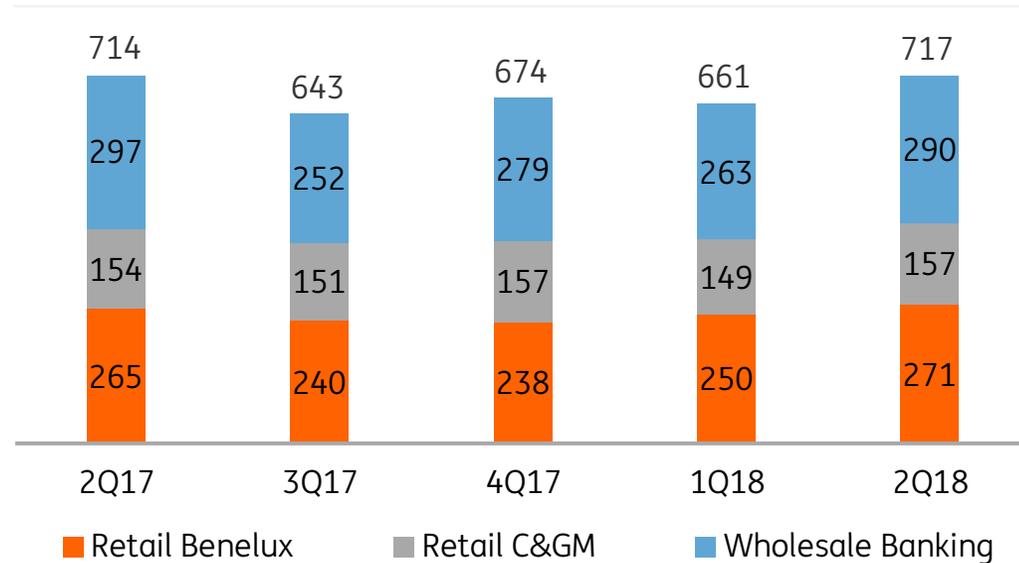

- 2Q18 core lending growth of €8.1 bln within Retail Banking was almost equally split between mortgages and higher-yielding non-mortgage lending
- In Wholesale Banking, the growth was well-spread across products, sectors and geographies with a skew towards longer-dated lending and strong activity in the shorter-dated Trade & Commodity Finance (part of ITEF) franchise

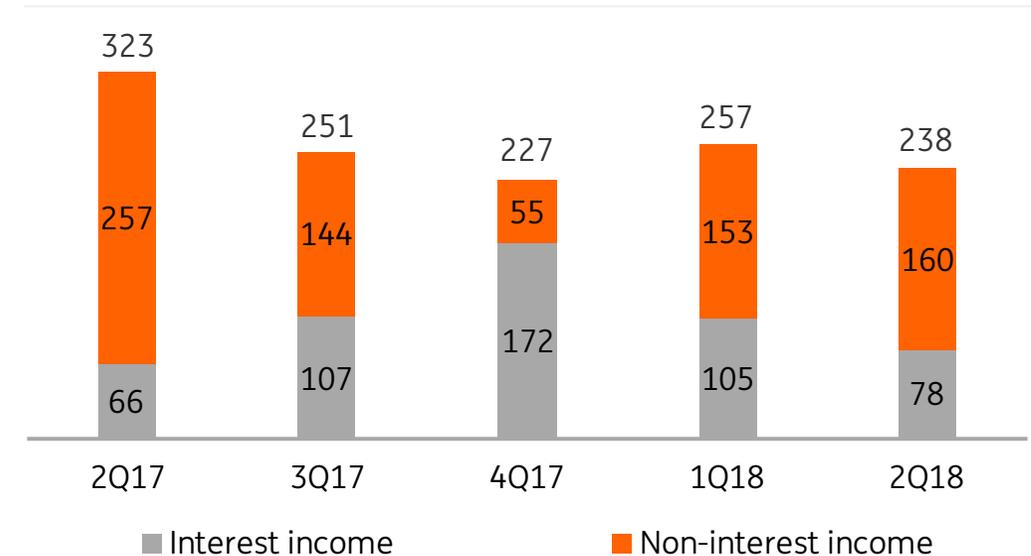

\* ITEF is International Trade & Export Finance; ETIG is Energy, Transport & Infrastructure Group; SFG is Specialised Financing Group; REF is Real Estate Finance; GL & TS is General Lending & Transaction Services; WB Other includes Financial Markets

# Broad-based fee income growth; FM impacted by client activity

Net fee and commission income (in € mln)

Underlying income Financial Markets\* (in € mln)

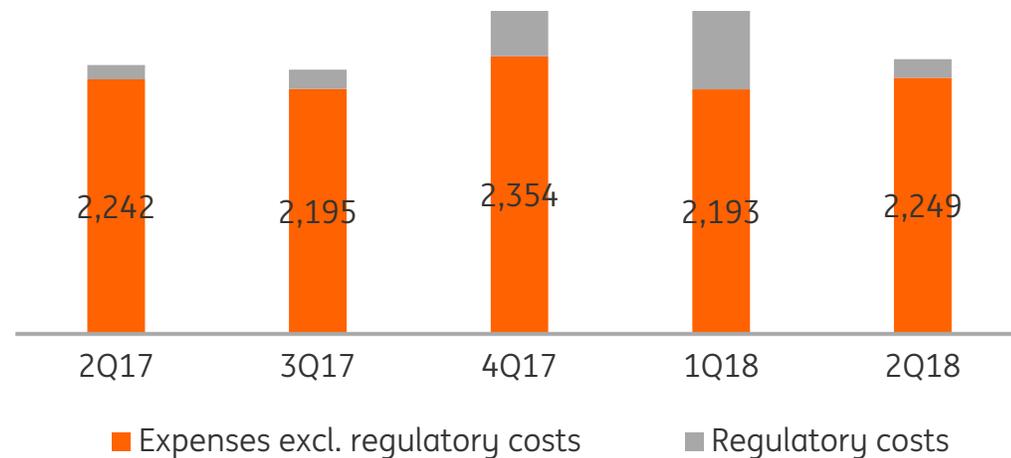

- Fee income increased by 8.5% on the first quarter of 2018 to €717 mln. This was driven by increases in most retail countries and higher fee income in Industry Lending and General Lending & Transaction Services (partly supported by the inclusion of Payvision as of 2Q18), while fees were lower in Financial Markets
- Financial Markets' total income was down on both comparable quarters, as this quarter was again impacted by reduced client activity, low interest rates in Europe and tight credit spreads

\* Excluding CVA/DVA

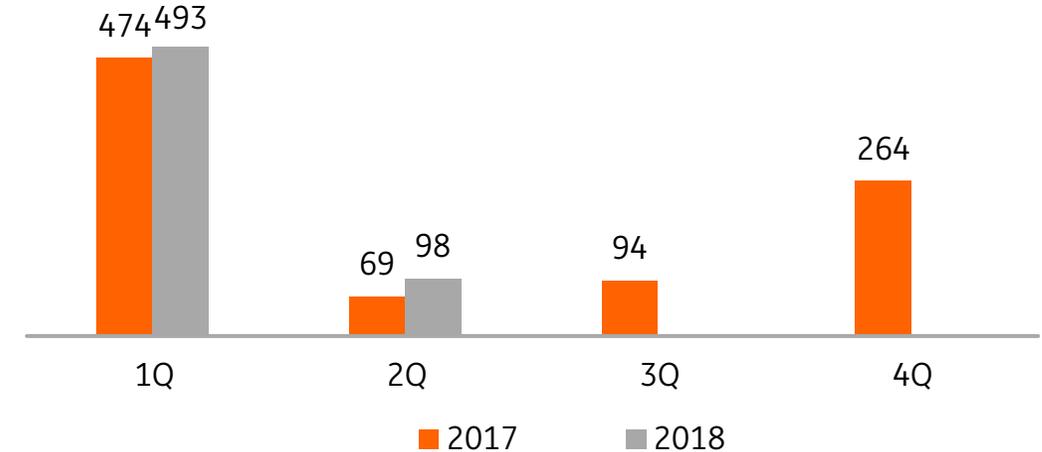

# Cost control a key priority

Underlying operating expenses (in € mln)

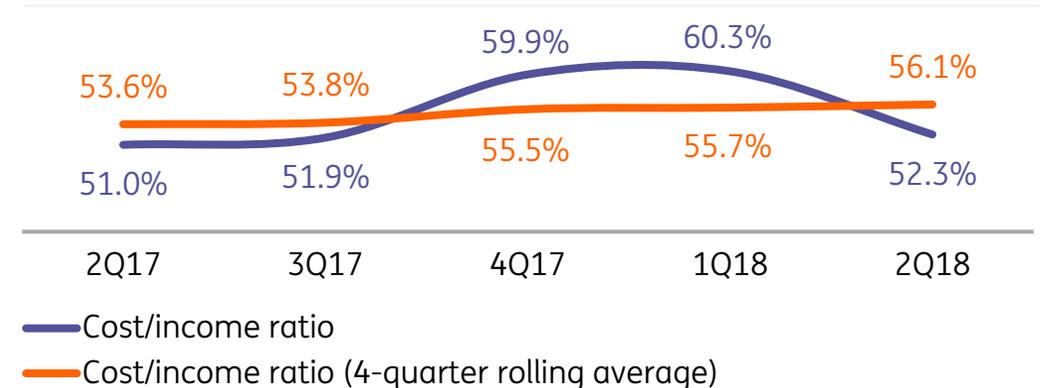

- Compared to 1Q18, which included a release of a legal provision, expenses excluding regulatory costs increased by €56 mln. This increase was also explained by the inclusion of Payvision and higher costs in Industry Lending
- Year-on-year, expenses excluding regulatory costs were broadly flat
- Total regulatory costs were slightly higher year-on-year as 2Q17 included a downward adjustment of the 2017 DGS contribution in Belgium

Regulatory costs (in € mln)

Cost/income ratio

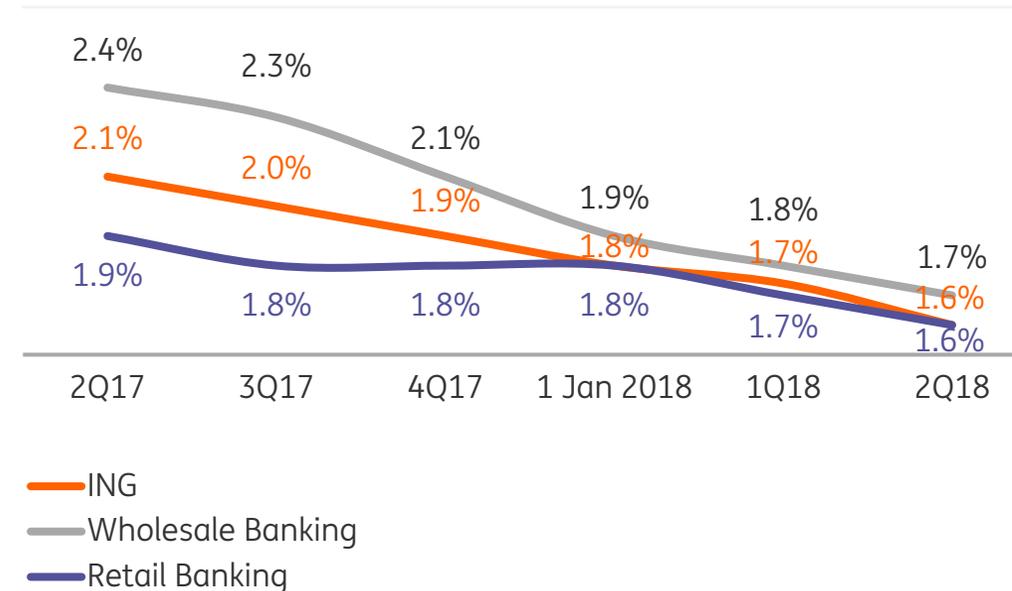

# Risk costs remained low due to a continued benign credit environment in most regions

Risk costs (in € mln)

Stage 3 ratio\*

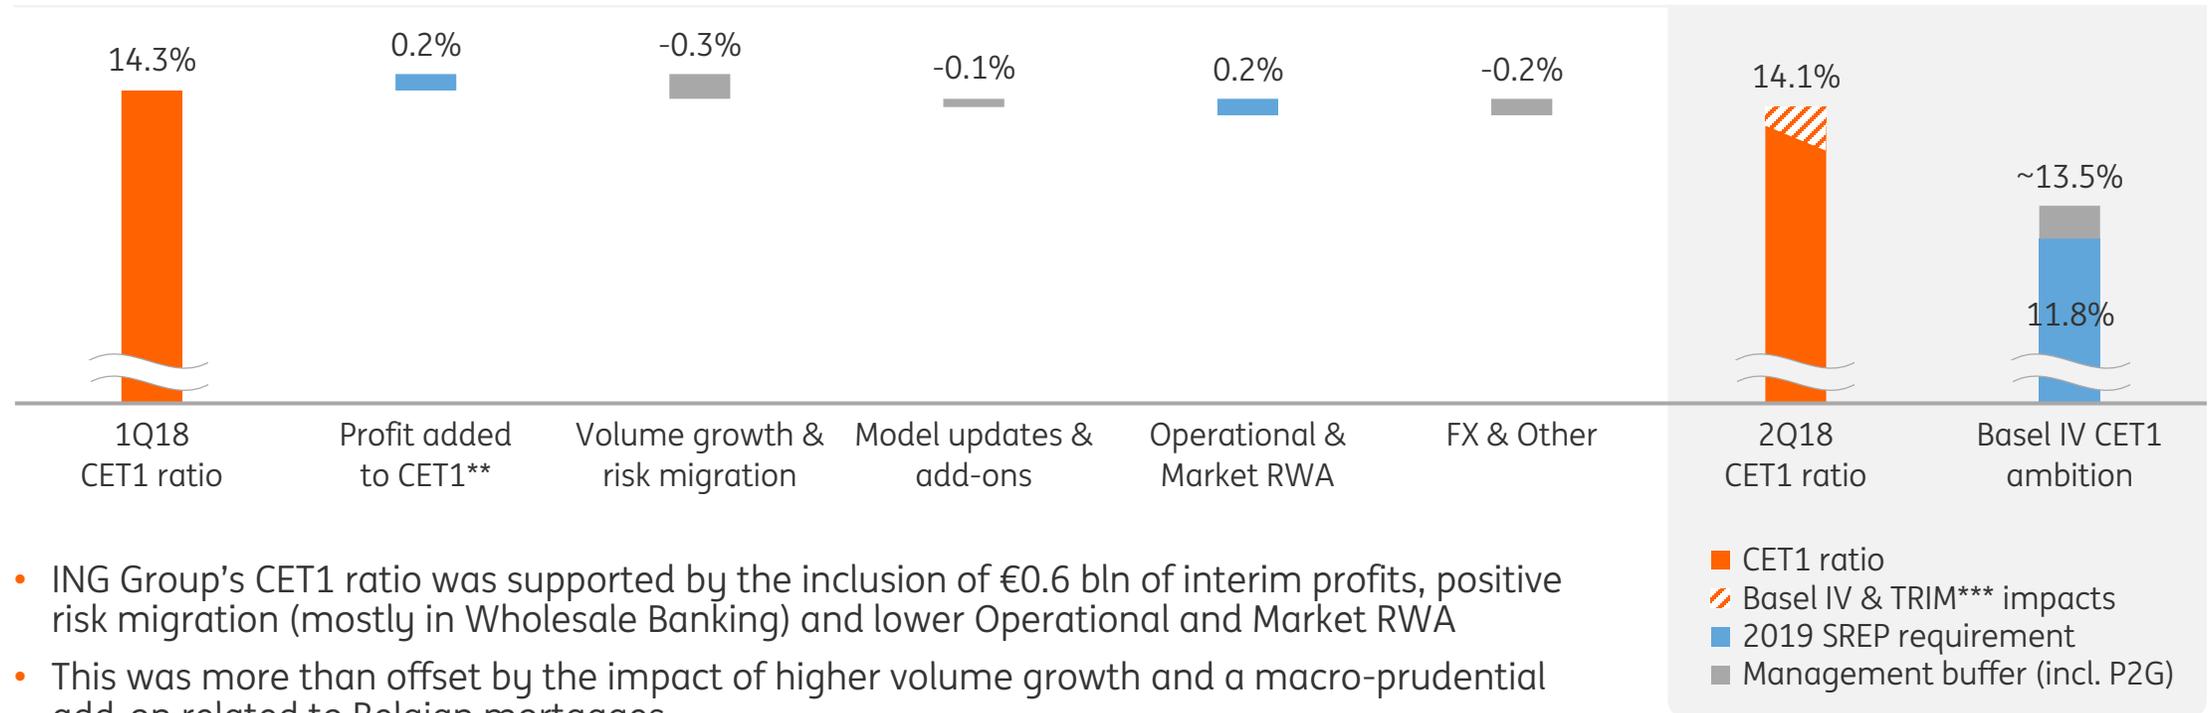

- 2Q18 risk costs were €115 mln, or 15 bps of average RWA, well below the 40-45 bps through-the-cycle average
- Retail Netherlands recorded a net release (€-47 mln), which was caused by releases in various portfolios, reflecting the continued positive economic conditions in the Netherlands as well as some model updates
- Wholesale Banking risk costs of €59 mln were largely impacted by higher Stage 2 provisioning for a number of clients

\* Prior to 1 January 2018, Stage 3 ratio was known as NPL ratio as per IAS 39 guidelines

# ING Group CET1 ratio at 14.1%

## ING Group fully loaded CET1 ratio development\*

- ING Group's CET1 ratio was supported by the inclusion of €0.6 bln of interim profits, positive risk migration (mostly in Wholesale Banking) and lower Operational and Market RWA
- This was more than offset by the impact of higher volume growth and a macro-prudential add-on related to Belgian mortgages
- With a long implementation phase, management actions and the transposition into EU law still pending, we remain confident that we will meet future Basel IV requirements

\* ING Group's 2Q18 fully loaded capital ratio is based on RWAs of €318.7 bln; small differences in the graph due to rounding

\*\* 2Q18 Group net profit of €1,429 mln, of which €868 mln is set aside for dividends and the remainder (€562 mln) added to CET1 capital

\*\*\* ECB's Targeted Review of Internal Models

\* Basel III CET1 ratio of 14.5% as per 1 January 2018 due to IFRS 9 adoption; Estimated Basel IV impact on CET1 of around -2.0 %-point will dilute current Basel III CET1 ratio over time

\*\* Implies management buffer (incl. Pillar 2 Guidance) of 170 bps over prevailing fully loaded CET1 requirements (currently 11.8%)

\*\*\* Based on 4-quarter rolling average; the ING Group ROE is calculated using IFRS-EU shareholders' equity after excluding 'interim profit not included in CET1 capital'. As at 30 June 2018, this comprised the 1H18 interim profits not included in CET1 capital of €1,735 mln

# Wrap up

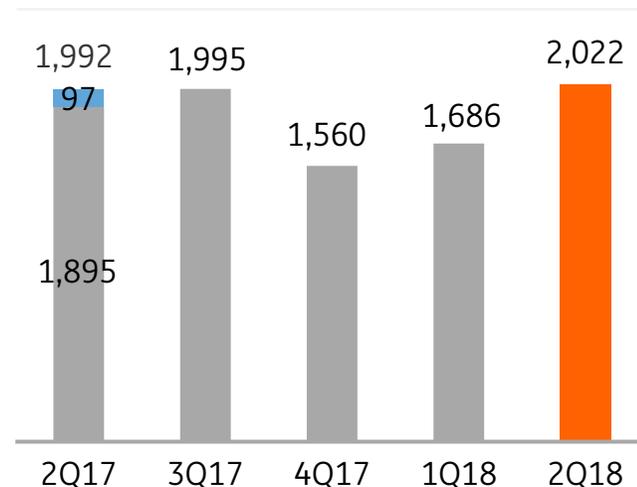

# Wrap up

- ING posted 2Q18 net profit of €1,429 mln, up 4.2% on 2Q17
- Result reflects well-diversified and disciplined loan growth at stable margins, strong fee income, and low risk costs
- Primary customers increased by 400,000 in 2Q18 to 12.0 mln, total retail customers reached 38.2 mln
- Important transformation milestones achieved including migration of Record Bank customers to ING in Belgium
- Group-wide cost control remains key focus as digital investment spend remain elevated
- On a four-quarter rolling average basis, ING Group's underlying return on equity was 10.4%
- Fully loaded CET1 ratio at 14.1% due to impact from continued profitable loan growth and a macro-prudential add-on in Belgium

Pre-tax result excl. volatile items  
and regulatory costs (in € mln)

- Excluding volatile items and regulatory costs, 2Q18 pre-tax result was up 5.8% from 2Q17, reflecting our continued focus on business growth and transformation in both the Retail and Wholesale Banking businesses as well as the stronger second quarter for Financial Markets in 2017
- Sequentially, the pre-tax result excluding volatile items and regulatory costs was up 0.8%, largely due to higher revenues, which were only partly offset by a normalisation of risk costs and higher operational expenses

\* 2Q17 one-time gain relates to the sale of an equity stake in the real-estate run-off portfolio (€97 mln)

# Potential for further core savings rate adjustments limited

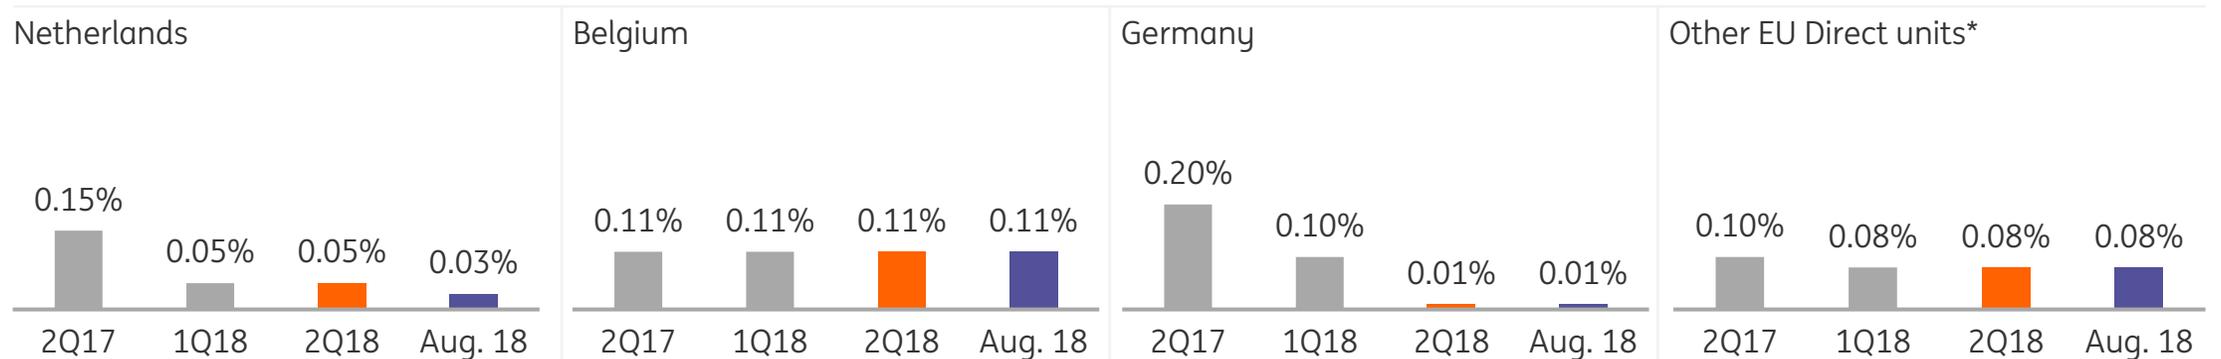

## Only few savings rate adjustments in 2Q18...

- In 2Q18, we reduced core savings rates in Germany from 10 bps to 1 bp and in Austria from 15 bps to 5 bps
- On 16 July 2018, core savings rates in the Netherlands were further lowered from 5 bps to 3 bps

## ...while we have other levers to stabilise NIM

- Continue growth in higher margin lending without changing our risk appetite
- Selective re-pricing in certain areas

## Core client savings rates

\* Unweighted average core savings rates in France, Italy and Spain
