ING's purpose is to empower people to stay a step ahead in life and in business. This purpose guides us in everything we do. It represents our conviction in people’s potential. We don’t judge, coach or tell people how to live their lives. However big or small, modest or grand, we help people and businesses to realise their own vision for a better future.

We know people don’t need banks, they need banking. Our promise to customers is to make banking frictionless, removing barriers to progress and giving people confidence in their ability to make decisions and to move forward. It frees them from the constraints that stand between them and their passions and encourages them to do more of the things that give their lives meaning.

Why we’re here
Who we are

ING is a global bank with a strong European base. Our more than 60,000 employees offer retail and wholesale banking services to customers in over 40 countries.

Our purpose is to empower people to stay a step ahead in life and in business.

Our products include savings, payments, investments, loans and mortgages in most of our retail markets. For our Wholesale Banking clients we provide specialised lending, tailored corporate finance, debt and equity market solutions, sustainable finance solutions, payments & cash management and trade and treasury services.

Customer experience is what differentiates us and we’re continuously innovating to improve it. We also partner with others to bring disruptive ideas to the market faster.
With many basic banking products indistinguishable from one bank to another, we want to stand out from the crowd by providing a superior customer experience.

Customers big and small expect an experience that's personal, easy, relevant and instant to their needs.

What this looks like will of course depend on the type of customer. For consumers and small businesses our focus is predominantly on mobile banking, while for corporate clients it’s all about personal relationships and superior sector and network expertise, supported by seamless digital delivery.

To give our customers a superior experience we’re building on our strong technology and operations foundation to provide seamless digital services while keeping their money and their data safe and secure.

What we promise our customers
We believe we can make the most impact and address the biggest challenges in two areas: **climate action** and **financial health**.

We want to help create a healthy planet with prosperous people. A planet not threatened by the climate crisis. People with basic human rights, decent work, good labour conditions and, ultimately, good financial health.

At the very least, we must ensure that our own operations are in line with the low-carbon economy of the future. That our employees are treated well and that neither we nor our suppliers infringe on human rights.

But as a bank with hundreds of billions of euros flowing through our books, we have a huge opportunity to make an impact for the better. We aim to bring aspects of fighting climate change and protecting human rights into our dialogue with clients and financing decisions.

Society is transitioning to a low-carbon economy. So are our clients, and so is ING. We finance a lot of sustainable activities, but we still finance more that’s not. See how we’re progressing on ing.com/climate.
**Our 3Q2023 results in numbers**

“ING recorded another strong set of results in the third quarter of 2023, with net result more than doubling on the prior year. Notwithstanding the cooling economy and amid polarising geopolitical developments, which impacted business and consumer confidence, both our Retail and Wholesale Banking businesses posted strong results. Their interest income benefited from the positive rate environment and fee income also increased, especially in Retail Banking, driven by daily banking and investment products.”

Steven van Rijsijk – CEO ING Group

<th>Society</th>
<th>In our Climate Report, we share our progress on the path to net zero, including how we engage with clients. We’re, as an example, developing an online tool to collect and assess the transition plans and sustainability performance of (eventually) our largest WB clients. Furthermore, we continued to invest in renewable energy. An example is our leading role in the financing of the first offshore wind farm in Poland, consisting of 76 wind turbines, which will – once completed - supply clean energy to over 1.5 million households.</th>
