ING Groep N.V.

Seminannual update

Summary

ING Groep's Baa1 senior unsecured rating primarily reflects its sole operating subsidiary ING Bank's sound credit fundamentals, notably its (1) resilient profitability, based on a diversified business mix, (2) its low asset risk, despite exposures to sensitive market segments as part of its diversified wholesale banking operations, and (3) its sound liquidity profile. For further details on ING Bank's baseline credit assessment (BCA), please refer to the related Credit Opinion.

ING Groep's senior unsecured rating also reflects our Loss Given Failure (LGF) analysis which concludes that there is a moderate risk of loss owing to the structural subordination of ING Groep's senior debt to ING Bank's senior debt in a resolution scenario, which results in a rating in line with the bank's baa1 Adjusted BCA. Furthermore we consider the probability of government support to ING Groep's senior unsecured debt to be low. We believe that the Dutch government's support would likely be provided only to the operating entity ING Bank given that the holding company debt is expected to absorb losses ahead of losses that could be born by the bank's own senior liabilities. As such ING Groep's debt does not benefit from government support uplift. Consequently ING Groep's senior unsecured debt rating is in line with ING Bank's BCA of baa1.

Credit strengths

» ING Bank's profitability has been resilient over the last few years, due to a balanced business mix across products, business lines and geographies.

» Asset risk is low, as result of the bank's diversified activities.

» ING Bank's liquidity and funding profile is sound due to lengthening debt maturities and group-wide asset and liability management.

Credit challenges

» ING is exposed to sensitive activities (e.g. oil and commodity finance) and geographies (e.g. Ukraine and Turkey) as part of its generally well diversified wholesale banking business.

» Low interest rates in the euro area exert pressure on the bank's net interest margin.

Rating Outlook

The stable outlook on ING Bank and ING Groep's long-term ratings reflect Moody's expectation that the banking group's profitability will remain broadly resilient to pressure

from low interest rates over the next 12-18 months, while asset risk will remain low and the capital position will continue to strengthen.

Factors that could lead to an upgrade

» ING Groep's ratings would likely be upgraded as a result of an upgrade of ING Bank's BCA. ING Bank's BCA could be upgraded in case of (1) a material improvement in the operating environment in the EU countries to which the bank is mostly exposed, leading to substantially improved asset risk and a higher profitability level; (2) a strengthening capital position; or (3) a lower reliance on confidence-sensitive wholesale funding. An upgrade in the BCA would likely lead to an upgrade to all ratings of ING Bank and ING Groep.

» ING Groep's senior unsecured debt ratings could also be upgraded if the holding company were to issue higher than expected amounts of long-term debt and/or junior instruments, leading to lower loss severity for senior creditors.

Factors that could lead to a downgrade

» Conversely, ING Groep's ratings could be downgraded as a result of a downgrade of ING Bank's BCA. ING Bank's BCA could be downgraded in case of (1) an unexpected deterioration in asset risk and profitability; or (2) a lower-than-expected capital position. A downgrade of the BCA would likely result in downgrades to all ratings.

Profile

ING Groep is the parent company of ING Bank N.V. (ING Bank; Aa3/Aa3 stable; baa1), the largest Dutch bank by assets (€906 billion at end-June 2018) and one of the largest financial institutions in Europe and globally.

This publication does not announce a credit rating action. For any credit ratings referenced in this publication, please see the ratings tab on the issuer/entity page on www.moodys.com for the most updated credit rating action information and rating history.

ING Groep holds a strong position in wholesale and retail banking. It also has a solid universal banking franchise in Belgium and Germany, where it operates through its local subsidiaries ING Belgium SA/NV (A1/A1 stable; baa1) and ING DiBa AG (A2 stable, a2), respectively.

In April 2016, the group has completed the divestment of its insurance operations by the sale of its remaining 14.1% stake in NN Group N.V. (a holding company which absorbed the former ING Verzekeringen in 2014), in accordance with European Commission's decision on state aid of 2009, amended in November 2012 and November 2013. As a result, ING Groep has become a "pure" bank holding company, with stakes limited to the group's banking activities.

Detailed credit considerations

ING Groep has historically had an integrated treasury and capital management strategy, whereby perpetual hybrid securities were raised via direct issuance at the level of the ultimate holding company (ING Groep) or via dedicated funding vehicles guaranteed by ING Groep. Conversely, lower Tier 2 capital or subordinated debt was raised directly from the main banking or insurance subsidiaries, according to their needs.

In the context of the Group's resolution strategy, which is driven by the Bank Recovery and Resolution Directive (BRRD), ING announced, in November 2016, that ING Groep will be the group's designated resolution entity. This single-point of entry strategy has been approved by the European Single Resolution Board (SRB) in January 2017. This will allow the group to issue senior unsecured and subordinated debt instruments qualifying for the European minimum requirement of own funds and eligible liabilities (MREL) and Financial Stability Board (FSB)'s total loss-absorbing capacity (TLAC) at the holding company.

This holding company debt to be issued will consist of Additional Tier 1, Tier 2 and senior unsecured debt securities, which will be structurally subordinated to the bank's own senior unsecured debt and deposits in a resolution scenario. In this regard, the group intends to issue, through ING Groep, at least €16 billion of senior unsecured debt by year-end 2019, in order to meet minimum MREL/ TLAC requirements and build a management buffer above this. Out of the total planned issuance, ING Groep's has to date issued more than €10 billion of senior unsecured debt and more than €4 billion of Tier 2 debt. We expect ING Groep to continue its issuance programme in line with its medium-term plan, based upon its continued good access to the capital markets.

The SRB has set the minimum requirement for own funds and eligible liabilities (MREL) for ING Groep at 10.9% of its total liabilities. This requirement has been set on data as of 31 December 2016 and corresponds to €91 billion or 29% of ING Groep's RWA at that time. The group already complies with this requirement.

As G-SIB entity, ING Groep is subject to Total Loss Absorbing Capacity (TLAC) rules, which are to be transposed into the EU law. The FSB framework requires a minimum TLAC of 21.5% of risk-weighted assets (RWAs) by January 2019, and 23.5% by January 2022[1]. ING Groep's pro forma TLAC was 21.5% as of December 2017.

At end-June 2018, ING Groep's fully-applied CET 1 ratio was 14.1%. ING Groep's capital is higher than that of ING Bank. The difference stems from the accumulated reserves and the profit retention policy at the holding company level. ING Groep has accumulated positive reserves from retained earnings and the sale of its insurance subsidiaries (Voya and NN Group) which were not distributed to shareholders and kept within the group in the perspective of future regulatory requirements (SREP, TLAC and MREL). Although part of this excess capital could be distributed to shareholders in the future, we do not expect this to happen in the short run as this surplus can help the group absorb the impact of upcoming regulatory changes, even though ING Groep's CET 1 ratios currently stand above the minimum requirement of 11.8% to be applied in 2019.

Finally, following the agreement on the finalization of Basel III rules last December (please also refer to our research report Basel Committee's agreement on risk weights is credit positive), the bank expects a 15-18% increase[2] in risk-weighted assets by 2027, other things being equal. Based on our calculations, this impact would reduce ING Groep's CET1 ratio by around 200 bps. Considering ING's current capitalisation and the timeframe for the implementation of the new rules (up to 2027 for the full output floor), we estimate that the impact is manageable for the group.

Support and structural considerations

Loss Given Failure and additional notching

ING Groep (together with its subsidiary ING Bank) is subject to the EU Bank Recovery and Resolution Directive (BRRD), which we consider to be an Operational Resolution Regime. We assume a residual tangible common equity at failure of 3% and losses post-failure of 8% of tangible banking assets, a 25% run-off in "junior" wholesale deposits (amounting to 26% of total deposits), a 5% run-off in preferred deposits, and assign a 25% probability of deposits being preferred to senior unsecured debt. These are in line with our standard assumptions.

ING has communicated planned issuance of at least €16 billion of ING Groep's senior unsecured and subordinated debt by year-end 2019 under its medium and long-term funding plan. We expect that ING will continue its issuance programme in line with its medium and long-term funding plan, based upon the group's continued good access to the capital markets.

Taking those elements into consideration, our LGF analysis indicates a moderate loss-given-failure for ING Groep's senior unsecured debt leading to no uplift from ING Bank's Adjusted BCA.

For subordinated debt issued by ING Groep our LGF analysis indicates a high loss-given-failure, which result in a negative adjustment, which result in a rating one notch below ING Bank's BCA. As regards junior subordinated debt and preference shares, we also incorporate additional downward notching to reflect coupon suspension risk ahead of failure, of one and two notches, respectively.

Please refer to the Credit Opinion for ING Bank, for further details on our LGF analysis.

Government support considerations

We consider the probability of government support to ING Groep's senior unsecured debt to be low as such support would likely be provided only to the operating entity in order to maintain its critical functions and mitigate risks to financial stability. Similarly, for junior securities, the probability of government support is low, and, as such, the ratings for these instruments do not include any related uplift.

Moody's Investors Service, Inc., a wholly-owned credit rating agency subsidiary of Moody's Corporation ("MCO"), hereby discloses that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by Moody's Investors Service, Inc. have, prior to assignment of any rating, agreed to pay to Moody's Investors Service, Inc. for appraisal and rating services rendered by it fees ranging from $1,500 to approximately $2,500,000. MCO and MIS also maintain policies and procedures to address the independence of MIS's ratings and rating processes. Information regarding certain affiliations that may exist between directors of MCO and rated entities, and between entities who hold ratings from MIS and have also publicly reported to the SEC an ownership interest in MCO of more than 5%, is posted annually at www.moodys.com under the heading "Investor Relations — Corporate Governance — Director and Shareholder Affiliation Policy."

Additional terms for Australia only: Any publication into Australia of this document is pursuant to the Australian Financial Services License of MOODY'S affiliate, Moody's Investors Service Pty Limited ABN 61 003 399 657AFSL 336969 and/or Moody's Analytics Australia Pty Ltd ABN 94 105 136 972 AFSL 383569 (as applicable). This document is intended to be provided only to "wholesale clients" within the meaning of section 761G of the Corporations Act 2001. By continuing to access this document from within Australia, you represent to MOODY'S that you are, or are accessing the document as a representative of, a "wholesale client" and that neither you nor the entity you represent will directly or indirectly disseminate this document or its contents to "retail clients" within the meaning of section 761G of the Corporations Act 2001. MOODY'S credit rating is an opinion as to the creditworthiness of a debt obligation of the issuer, not on the equity securities of the issuer or any form of security that is available to retail investors. It would be reckless and inappropriate for retail investors to use MOODY'S credit ratings or publications when making an investment decision. If in doubt you should contact your financial or other professional adviser.

Additional terms for Japan only: Moody's Japan K.K. ("MJKK") is a wholly-owned credit rating agency subsidiary of Moody's Group Japan G.K., which is wholly-owned by Moody's Overseas Holdings Inc., a wholly-owned subsidiary of MCO. Moody's SF Japan K.K. ("MSFJ") is a wholly-owned credit rating agency subsidiary of MJKK. MSFJ is not a Nationally Recognized Statistical Rating Organization ("NRSRO"). Therefore, credit ratings assigned by MSFJ are Non-NRSRO Credit Ratings. Non-NRSRO Credit Ratings are assigned by an entity that is not a NRSRO and, consequently, the rated obligation will not qualify for certain types of treatment under U.S. laws. MJKK and MSFJ are credit rating agencies registered with the Japan Financial Services Agency and their registration numbers are FSA Commissioner (Ratings) No. 2 and 3 respectively.

MJKK or MSFJ (as applicable) hereby disclose that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by MJKK or MSFJ (as applicable) have, prior to assignment of any rating, agreed to pay to MJKK or MSFJ (as applicable) for appraisal and rating services rendered by it fees ranging from JPY200,000 to approximately JPY350,000,000.

MJKK and MSFJ also maintain policies and procedures to address Japanese regulatory requirements.
